REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: the present invention relates to an electrically alterable non-volatile memory cell having more than two bits. The independent claims 1, 7, 13, 20, 27 and 33 recite a non-volatile memory device comprising a plurality of multi-data memory cells, a sensing/programming-verifying circuitry receiving a parameter which represents the threshold voltage of one non-volatile memory cell, a first programming reference parameter, a first read reference parameter, a second programming reference parameter, a second read reference parameter, a third programming reference parameter and a third read reference parameter; wherein wherein the series of programming operations includes a first programming operation and a second programming after the first programming operation, the duration of the second programming operation being shorter than that of the first programming operation. The PRIOR ART fails to disclose or suggest such an electrically alterable non-volatile memory cell having more than two bits as described in the independent claims 1, 7, 13, 20, 27 and 33, therefore, claims 1-44 are in condition for allowance.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
